

PROLOZONE THERAPY

REGENERATING JOINTS AND ELIMINATING PAIN

Prolozone therapy is a non-surgical procedure used to eliminate or drastically reduce pain by facilitating the body's own natural ability to heal itself.

Prolozone uses the power of oxygen to cause damaged tissues, joints, ligaments, and tendons to regenerate. This may cause complete healing and a permanent end to pain.

WHAT IS PROLOZONE?

Prolozone combines lidocaine, B12, dextrose, homeopathic anti-inflammatories, nutrients, and oxygen

- Lidocaine re-polarizes injured cell membranes and improves circulation
- Traumeel & Zeel are homeopathic remedies that decrease inflammation
- Quinton Isotonic contains 78 essential minerals and trace elements the body relies on for supporting cellular health
- Dextrose supplies our mitochondria
- B12 improves glucose utilization
- Ozone (O3) stimulates circulation, improves oxygen utilization, stimulates cytokines, and directly kills microbes
